PROFILE

Cloud & Automation Engineer with experience in AWS infrastructure, cloud operations, CI/CD workflows, and automation tooling. Skilled in scripting and process automation using Python, JavaScript, Bash, and Java. Experienced with Linux systems, Jenkins workflows, and AWS services in enterprise environments. Currently upskilling in Java backend development with Spring Boot and REST APIs while pursuing B.Sc. in Compute & Design (WiLP) at BITS Pilani.

EXPERIENCE

Analyst — Cloud & Infrastructure

HCLTech (Client: Johnson & Johnson)

Sep 2022 — Present

Noida, India

- Managed Windows and Linux infrastructure supporting enterprise cloud services and deployment operations.
- Worked with Jenkins CI/CD pipelines for AWS/GCP/AZR AMI build, validation, and deployment workflows.
- Built internal automation tools and operational scripts using Python, JavaScript, and PowerShell to reduce manual effort.
- Troubleshoot AWS EC2, EBS, IAM, networking, and security-related issues across cloud environments.
- Worked with AWS services including EC2, EBS, S3, CloudWatch, and IAM, with exposure to Lambda, SQS, SNS, SES, and RDS.
- Collaborated with cross-functional teams to resolve infrastructure and deployment issues.

EDUCATION

BITS Pilani (Work Integrated Learning Programme)

Bachelor of Science — Compute & Design

India

Feb 2023 — Present

- Coursework: Programming, Data Structures, Algorithms, System Design.

PROJECTS

NppVim — C++ Plugin Development

github.com/h-jangra/NppVim

- Developed a Notepad++ plugin adding Vim-style modal editing and key bindings.
- Implemented command handling and editor integration using C++ and Win32 APIs.

Ghost.sh — Shell Tooling

github.com/h-jangra/Ghost.sh

- Built a lightweight Bash utility providing inline ghost text suggestions.
- Focused on terminal usability and workflow efficiency.

InfraMedic — AI-Powered SRE Platform

github.com/h-jangra/InfraMedic

- Autonomous multi-agent platform for cloud monitoring, incident response, and remediation.

DocumentViewer — Chrome Extension Development

github.com/h-jangra/DocumentViewer

- Created a Chrome extension that opens documents in-browser instead of downloading.
- Implemented URL rewriting and viewer integration using JavaScript.

SKILLS

Languages: Java, Python, JavaScript, C++

Technologies: AWS, Docker, FastAPI, React, REST APIs, CI/CD

Tools: Git, Linux, MySQL

CERTIFICATIONS

Google Cloud Certified Generative AI Leader

Microsoft Certified: Azure AI Engineer Associate
